DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 10-27 in Paper No. 8 in response to the restriction requirement mailed March 11, 2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-17, and 19-26, drawn to a vaporizer, classified in class 261, subclass 66.
- II. Claims 18 and 27, drawn to a chemical vapor deposition system, classified in class 118, subclass 726.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a valve seat through which fluid flows or a valve element opposite the valve seat as required by the subcombination. The subcombination has separate utility such as a vaporizer used as a humidifier.

Art Unit: 1724

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. During a telephone conversation between Mr. Samuel S. Lee and Examiner Richard Bueker on July 23, 2003 a provisional election was made with traverse to prosecute the invention of the invention of Group I, claims 10-17, and 19-26. Affirmation of this election must be made by applicant in replying to this Office action. Claims 18, 27, and 28 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Drawings

7. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign mentioned in the description: **72**, as mentioned at page 10, line 29, and page 11, lines 7, 10, 11, 16, and 18. **A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.**

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 1724

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 10-17, and 19-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, and 24 of U.S. Patent No. 6,224,681. Although the conflicting claims are not identical, they are not patentably distinct from each other because the independent claims differ only in either functional language that does not effect the scope of the apparatus claim, or in the recitation within the patent that the valve mechanism is in the form of a proportional valve, which does not patentably distinguish the claims from one another since the disclosure of the patent and the instant application disclose only proportional valves as appropriate fluid control valve means. The dependent claims are included herein since the structures recited thereby are well known within the art as evidenced by any one of several of the cited, but unapplied prior art references.
